Sprocket kicks video processing into high gear

The video processing framework uses serverless cloud infrastructure to run tasks in parallel and reduce latency and cost.

30 years ago, the world's first cyberattack set the stage for modern cybersecurity challenges

The Morris worm set the stage for the crucial, and potentially devastating, vulnerabilities in what has been called the coming internet of everything.

Denver builds out sensor network at schools

The network could help the city better understand the link between air quality and asthma.

Federal IT's 'Golden Gate' moment

Like maintaining the iconic Golden Gate Bridge, digital transformation is an ongoing process that requires a combination of the right technology, partnerships, people and processes.

SPONSORED BY: FEDERAL IT ACQUISITION SUMMIT

Join us November 15th in Washington, DC

Attend the Federal IT Acquisition Summit on November 15th. Hear speakers from DHS, DISA, GSA and NASA SWEP as they provide contract-specific training opportunities and expert insights into key trends and developments in federal IT contracting. Opportunities to receive CPEs are available.
